About us

/mission, vision and valuables

Vision

We are an IT company that provides a wide range of services for the development and promotion of websites. In addition, we provide quality and comprehensive technical support for your site, using the latest and original technical solutions.

Mission

We work to improve the level of business of our customers, help with the development of their product, taking into account current trends and consumer needs. And for our corporate partners, we offer comprehensive solutions for online business development.

Valuables

Every project we undertake, we make high quality and convenient not only for the audience but also for the client. We guarantee modern solutions, excellent clean code and business-oriented processes.

Services and expertise

Technologies

we create using the CMS WORDPRESS

we create an adaptive web design

we make up using:

- HTML5+ CSS3+JQUERY create WOW-animation.
- PHP, MySQL

we follow the trends in technologies and design

We save businesses from unattractive and ineffective websites

we have launched many projects.

With all our experience we have developed our own approach to creating successful websites that create unique business value in the eyes of our clients.

Creating process

analysis

- business task
- competitors
- target audience
- client insights

discover

we study on what technologies it is better to implement the project

strategy

deep analysis lies into online strategy of a future website.

structure

- marketing specialties
- emotional components
- sections
- pages

design

we also designs website for your business: from UX research to adaptive versions

development

considering the strategy and structure, a development team creates a site. The rest is a technical matter.

QA/QC

then we test the site and give the customer a reliably tested product

marketing

website is done.
now we have to
present it to the
world.

Our last awards

/site of the year
